The whole world has in one way or the other been affected by the Corona Virus. In the educational space, schools have been closed temporarily to curb the spread of the COVID-19. Our wish is that learners must be able to learn while at home.

In this regard, the department offers a wide range of education platforms to support learners and to provide guidance to parents during this period.

These platforms includes Radio lessons, the Dial a Tutor and a series of Electronic Education Platform targeting both the General Education and Training Phase as well as the Further Education and Training Phase.

These platforms are professionally designed to supplement the work that should be done in the classroom as such all our learners are requested to take advantage of them and learn in the comfort of their homes.

Most of the platforms are zero rated to make it easy for learners to access. We therefore request parents to encourage their children to utilise them, to motivate and monitor their children studies during this period.

This booklet has been developed guide on how to access which service and will be widely circulated to provide details about the aforesaid platforms, dates as well as time slots.

While learners will be taking advantage of these support programmes, we wish to re-iterate that we should all heed the precautionary measures against the spread of the Corona Virus.

Let us all practice social distancing and wash our hands regularly with soap. Each and every one of us should play a role in combating the invisible enemy called COVID-19 which threatens our lives and ways of living. We wish to encourage all our Educators and Learners to observe the measures as outlined on the announcement of the lockdown and to keep Safe throughout the period.

MR BONAKELE MAJUBA
MEC FOR EDUCATION
Old Mutual has a proud history of supporting education initiatives, inclusive socio-economic development and nation-building.

We are committed to partnering with the people of South Africa to help achieve the developmental agenda of the nation.

Now, as our business marks 175 years of enabling positive futures, our role as an agent and facilitator of positive change in the communities where we operate has never been more critical.

We are intensifying our efforts to make a difference and we will work together harder than ever to support our stakeholders, strengthen the economy, and assist the vulnerable.

It is for this reason that we have partnered with the Mpumalanga Department of Education to mitigate the impact of the Covid-19 pandemic on schooling, teaching and learning in particular.

We intend to promote education delivery and thus we encourage learners, teachers, and parents to make good use of the intervention strategies offered by our partnership with the Mpumalanga Department of Education.

We have tried to minimise the financial impact of studying at home and we are confident that these programmes will impact learner performance positively and reflect our social solidarity with the Mpumalanga community.

To help combat the pandemic, we urge everyone to take all the precautionary measures. Practise good hygiene by washing hands with soap regularly and keeping a distance between yourself and other.

The time is now to ensure we have #SafeHands and #FlattenTheCurve.

Let us be responsible and help save lives as we keep learning.

The Department has resuscitated the Dial-A-Tutor programme to assist learners who experience challenges with subject content while studying at home.

Learners should dial **087 223 3033** from Mondays- Thursdays between **09H00 and 15H00**

This call is at no charge to a learner even if they use their cell phones. In this case when a learner phones, the system will terminate the call and immediately call back.

The learner will be guided on options to follow leading to an interaction with the relevant Tutor.

All learners are urged to take advantage
Always wash your hands thoroughly with clean water and soap.

Protect yourself and other from the disease.
